

Nozzles

NZ009 and NZ016

NZ012

NZ015-HV & NZ015

Kochek: Hose End Nozzles are all made of the highest quality aluminum, stainless steel and rubber components that are powder coated to provide reliability, durability and versatility.

■ **Dual Gallonage “JUMP” Nozzles - NZ009 (1”Hose), NZ016(3/4” Hose)**

Provides a straight narrow stream and fog at 10 GPM before “jumping” to increase volume to 24 GPM at optimum flow. While maintaining reduced flow with high pressure ratings, this nozzle creates a misting fog perfect for cooling turf and syringing in light and frequent applications. Great for equipment and stadium washdown at the 10 GPM setting, this nozzle provides a fine, high velocity stream.

■ **Constant Flow Nozzles - NZ010 (1” Hose), NZ017(3/4” Hose)**

Provides both a wide fog and straight stream at an optimum flow rate of 35 GPM. This is a multi-purpose nozzle is for hand watering applications including heavy watering, syringing, cooling, infield conditioning, along with equipment and stadium washdown.

■ **High Volume Dual Gallonage “JUMP” Nozzles - NZ012 (1-1/2” Hose), NZ015-HV (1” Hose), NZ015 (1” Hose)**

Our high volume “jump” nozzles provide 60 GPM at optimum flow rate to allow heavy watering of turf or infields. This nozzle comes equipped with the “JUMP” feature to provide a stream and fog at 20 GPM, making it the most versatile of all the “jump” nozzles while providing the greatest volume capabilities. It should only be used with 1” hose or larger for best results. Kochek’s **NEW** “NZ015-HV” will flow at 100 GPM through a 1” hose.
